-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Liebscher (US patent 3,906,575).

The patent to Liebscher discloses the invention as is claimed, including a floor sweeper (fig.1) having a main brush (10) and two auxiliary brushes (15) which flank said main brush. The auxiliary brushes are rotatable about vertical axes and are driven by ground engaging wheels (16) independently of the main brush, which is driven by ground engaging wheels (12).

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1744

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berfield et al (US patent 4,701,969) in view of Gomez (US patent 2,670,485).

The patent to Berfield discloses the invention, a floor sweeper, substantially as is claimed, including a body (12) having a main brush (20) which is flanked by two auxiliary rotary brushes (702,704). The auxiliary brushes are driven by belts (708,710) which are coupled with wheel pulleys (711,713) mounted to surface engaging wheels (16,14). The main brush is also driven by the surface engaging wheels via the shaft (26), a separate pulley (52) and belt (56).

The patent to Berfield discloses all of the above recited subject matter with the exception of the main brush being drive by a motor.

The patent to Gomez discloses a floor sweeper wherein the main brush (24) is driven by motor (52) via a belt (56) extending between the pulley (54) on the motor and the pulley (58) on the brush.

Art Unit: 1744

It would have been obvious to one of skill in the art to drive the main brush of Berfield with an electric motor, as clearly suggested by Gomez, to reduce the drag on the surface engaging wheels, thus making the sweeper easier to push. As the main brush of Berfield has a separate drive from the auxiliary brushes, it would appear an easy substitution of one drive for another to provide the electric motor drive, as suggested by Gomez, for the wheel driven drive.

### ***Conclusion***

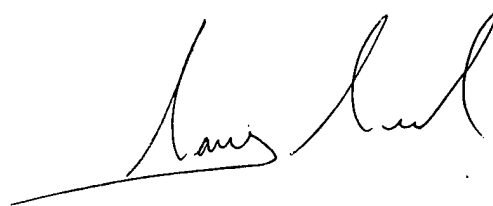

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure..
